

Walla Walla Basin Watershed Strategy

OPEN HOUSE

Thursday, Oct. 10, 2024

4:30-7:30 PM

Presentations from 5:00 - 7:00 PM
Stations & tables open all night
Light refreshments will be served

Reid Campus Center Ballroom,
Whitman College

280 Boyer Ave, Walla Walla, WA 99362

Join us to learn what we are doing to address water issues in the Walla Walla River Basin at our Open House! Open to all ages, with stations to explore, interactive activities, a welcome from the Umatilla Tribes, and presentations from local watershed experts. Presentation topics include:

- Walla Walla Watershed 101
- Caring for Backyard Streams
- Potential Future Infrastructure Project
- City of Walla Walla's Watershed Resiliency Plan

In the Walla Walla River Basin, there is not always enough water available to meet the needs of our local communities, Tribes, farms, and aquatic ecosystems.

The Walla Walla 2050 Watershed Strategy is a collaborative effort of people working together to meet the Basin's growing water needs and provide water for healthy rivers, fish, farms, and people.
